

DURLAST

Drywall Primer

DESCRIPTION

DURLAST is a high quality, drywall primer specifically formulated to fill the pores and equalize the suction difference between gypsum board surface paper and compound. **DURLAST** is to be applied as a first coat to the entire, prepared gypsum board surface and skim coatings to help minimize most decorating problems prior to decoration.

ADVANTAGES

DURLAST is a high hide, fast drying, economical drywall primer that minimizes joint banding and photographing. **DURLAST** is designed to give you a dry film thickness superior to most high build and paint primers. **DURLAST** has excellent hiding properties which gives you the versatility to apply over trim. **DURLAST** can also act as a texture additive to increase bond, hide and whiteness to wall and ceiling spray textures.
