

# DURA-SKIM

Acrylic Skim Coat/Texture

## PRODUCT DESCRIPTION

*TWI Next Level BRAND* DURA-SKIM is an interior, acrylic compound used for skim coat, texture, and/or filling or skimming out cinder block, concrete block, brick, and poured or pre-cast concrete to hide joints, cracks and other minor surface imperfections up to ¼" deep. *TWI Next Level BRAND* DURA-SKIM is designed to provide a hard, durable surface for final decorations. *TWI Next Level BRAND* DURA-SKIM is ideal for barracks, apartments, hotels, hospitals, manufacturing plants, offices, restaurants, and schools.

## ADVANTAGES

*TWI Next Level BRAND* DURA-SKIM is a more durable compound, with better adhesion and less shrinkage than conventional joint compounds. *TWI Next Level BRAND* DURA-SKIM is formulated to provide easy workability and open time for hand or spray applied applications. It is more economical than furring and finishing gypsum board. For voids larger than ¼" it is required to pre-fill voids with setting compound, prior to application. *TWI Next Level BRAND* DURA-SKIM is also an excellent substrate for *TWI Next Level BRAND* DURA-TEX acrylic texture finish, where abuse, moisture, and mildew resistance are of concern.
