Product Description

TWI Next Level Is a premixed, ready-to-use, vinyl based joint compound ideal for all phases of gypsum wallboard finishing. *TWI Next Level* may also be used to skim coat, texture, and repair plaster.

Advantages

TWI Next Level Is formulated to provide superior working qualities such as; low shrinkage, excellent adhesion, good crack resistance, excellent sanding qualities, and easy workability.

Surface Preparation

Surfaces should be clean, dry, and free of grease, wax, dust, concrete releasing agents, and gloss. Do not apply to shower areas directly exposed to water.

1. Assure that all fasteners and joints are thoroughly dry prior to decorating.
2. New gypsum wallboard surfaces that are to be painted or textured should be primed with TWI's DURLAST drywall primer or *SPRAYPLAST* Level 5 Primer/Surfacer.
3. Concrete, plaster, and masonry surfaces must be sealed with *DS 750* 100%Acrylic Primer/Sealer. Allow new concrete to cure 30 days.
