

PRIME-COAT

Drywall Primer

PRODUCT DESCRIPTION

TWI Next Level BRAND PRIME-COAT is an interior, drywall primer for new gypsum wallboard that is formulated to provide a smooth, even coat that minimizes minor surface imperfections and the porosity and surface texture differences between the gypsum board and joint compound to create a uniform surface for finish coat(s). The pigments and fillers in *TWI Next Level BRAND* PRIME-COAT provide good wet hide and a superior dry film thickness unlike traditional paint and high build primers. *TWI Next Level BRAND* PRIME-COAT is a fast drying, versatile, drywall primer that can also be applied before or after texture application to minimize joint banding, flashing, and photographing under critical lighting conditions.

TWI Next Level BRAND PRIME-COAT is ideal for single family, multi-family, hotels, resorts, military, health care, schools, restaurants, and other high traffic or commercial construction.

ADVANTAGES

- High Hide
- Fast Drying
- Roll or Spray
- High Build
- Hides Minor Surface Imperfections
- Minimizes Joint Banding and Photographing
- Dry Film Thickness superior to conventional paint/primer
- Low VOC
