

SPRAY-PLAST

Level 5 Primer/Surfacer

PRODUCT DESCRIPTION

TWI Next Level BRAND SPRAY-PLAST powder is an interior, Level 5 Primer/Surfacer for new gypsum wallboard application that when applied over a level 4 gypsum board finish, in accordance to *Recommended Levels of Finish for Gypsum Board GA-214/ASTM C840* specifications, achieves a Level 5 finish which is the highest quality gypsum board finish. In one spray application, *TWI Next Level BRAND* SPRAY-PLAST powder replaces the costly and labor intensive, skim coat of joint compound and a coat of primer. *TWI Next Level BRAND* SPRAY-PLAST powder is specially formulated with great wet hide that hides minor surface defects and provides a smooth, sandable surface. *TWI Next Level BRAND* SPRAY-PLAST powder is designed to equalize porosity and suction differences between the gypsum wallboard and joint compound. This allows the paint to dry at a uniform rate for better paint coverage and minimize joint banding, flashing and photographing under critical lighting conditions.

TWI Next Level BRAND SPRAY-PLAST powder is ideal for single family, multi-family, hotels, resorts, military, health care, schools, restaurants, and other or commercial construction.

ADVANTAGES

- Cost Effective Way to Achieve Level 5 Finish
- Easy to Apply
- Hides Minor Surface Imperfections
- Provides a Smooth, Sandable Surface
