1. Identification

Product identifier: SPRAY-PREP
Other means of identification: Drywall Primer, High Build Primer, High Build Primer/Surfacer
Recommended use: High Build Primer for use in interior gypsum walls and ceilings.
Recommended restrictions: Use in well ventilated area, use personal protective equipment, avoid skin contact and avoid breathing dust.

Manufacturer/Importer/Supplier/Distributor Information
Company name: Tool World, Inc.
Address: 300 West Norton Ave.
Eustis, FL 32726
Telephone: 1-800-331-8273
Website: www.twiproducts.com
Emergency phone number: 1-800-255-3924

2. Hazard(s) Identification

United States (US)
According to OSHA 29CFR 1910.1200 (HCS)

GHS Classification of the substance or mixture
Carcinogenicity - Category 1A - (H-350)
Specific target organ toxicity, repeated exposure – Category 1 (H-372)
Acute toxicity, inhalation - Category 4 (H-332)
Skin corrosion/irritation Category 2 (H315)

GHS Label Elements
Pictogram

Signal Word: Danger
Hazard Statements
H-350 May cause cancer.
H-332, 372 Harmful if inhaled. May cause damage to organs (lungs) through prolonged or repeated exposure.
H-315 Causes skin corrosion/irritation

Precautionary Statements
Prevention
Obtain special instructions before use.
Do not handle until all safety precautions have been read and understood.
Do not breathe dust.
Use personal protective equipment as required. (See Section 8)
Use engineering controls and wet methods to minimize dust.

Response
If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing.
If on skin, wash with plenty of soap and water.
If in eyes, rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing
Get medical attention if exposed or concerned.

Storage
Store material in a cool, dry, ventilated area, away from excessive heat or sunlight.

Disposal
Dispose of material in accordance with local, state, federal and international regulations.

### 4. First-Aid Measures

**Inhalation**  
Exposure to mists may cause temporary irritation to eyes, skin, nose, throat, and upper respiratory tract. Move injured person into fresh air and keep person calm under observation. Get medical attention if symptoms persist.

**Eye contact**  
Do not rub or scratch eyes. Immediately flush eyes with water for 15 minutes. Remove contact lenses (if applicable). Seek medical attention if irritation persists.

**Skin contact**  
Flush and wash skin with soap and water. Utilize lotions to alleviate dryness if present. Seek medical attention if irritation persists.

**Ingestion**  
Rinse mouth. Get medical attention if symptoms occur.

**Medical conditions**  
Pre-existing upper respiratory and lung diseases such as, but not limited to, bronchitis, emphysema and asthma. Pre-existing skin diseases such as, but not limited to, rashes and dermatitis.
5. Fire-Fighting Measures

6. Accidental Release Measures

| Personal precautions protective equipment and emergency procedures | See Section 8 of the SDS for Personal Protective Equipment. If any dust needs to be removed, use appropriately equipped vacuum. |
| Methods and materials for containment and cleaning up | Prevent entry info confined areas or water systems. Dilute with water and mop or wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Dispose of waste according to local regulations. |
| Environmental precautions | Avoid discharge to drains, sewers, and other water systems. |

7. Handling and Storage

| Precautions for safe handling | Minimize exposure to mists and dust. In case of insufficient ventilation, wear protective and suitable respiratory equipment. Observe good industrial hygiene practices. Use proper lifting techniques. |
| Conditions for safe storage, including any incompatibilities | Store in a cool, dry place. Store in a closed container away from incompatible materials. Protect from moisture. Keep away from heat. Do not use if material has spoiled, i.e., there is a moldy appearance or an unpleasant odor. Keep containers closed when not in use. Protect from freezing, extreme heat and direct sunlight. |

R-Respirable dust
Mppcf-Million particles per cubic foot

---

### Appropriate engineering controls

Provide sufficient ventilation for operations causing dust formation. Observe occupational exposure limits and minimize the risk of exposure.

### Individual protection measures, such as personal protective equipment

#### Respiratory Protection

A NIOSH/MSHA approved particulate respirator is recommended in poorly ventilated areas or if the PEL/TLV is exceeded. OSHA’s 29 CFR 1910.134 (Respiratory Protection Standard) must be followed whenever work conditions require respirator use.

#### Eye Protection

Safety glasses or goggles.

#### Skin

Gloves, long sleeve shirts/long pants and/or barrier creams may be utilized if conditions warrant.

#### General Hygiene

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Observe any medical surveillance requirements.
9. Physical and Chemical Properties

(a) Appearance: Off white
(b) Odor: Mild
(c) Odor threshold: Not available.
(d) pH: 7-10
(e) Melting point/freezing point: Not available
(f) Initial boiling point and boiling range: Not available
(g) Flash Point: Not available
(h) Evaporation rate: Not available.
(i) Flammability (solid, gas): Not flammable.
(j) Upper/lower flammability or explosive limits: Not available
(k) Vapor pressure: Not available.
(l) Vapor density: Not available
(m) Relative density: 1.0-1.8
(n) Solubility(ies): Soluble in water
(o) Partition coefficient: Not available
(p) Auto-ignition temperature: Not available
(q) Decomposition temperature: Not available
(r) Viscosity: Not Available
(s) Volatile organic compound (VOC) content: 6 g/l

10. Stability and Reactivity

Reactivity
Chemical stability
Possibility of hazardous reactions
Conditions to avoid
Incompatible materials
Hazardous decomposition products

The product is stable and non-reactive under normal conditions of use, storage, and transport.
Material is stable under normal conditions.
Hazardous polymerization does not occur.
None known.
Strong acids.
None known. Above 825°C limestone (CaCO₃) decomposes to calcium oxide (Cao) and carbon dioxide (CO₂)
11. Toxicological Information

Information on likely routes of exposure

Ingestion  
Could cause abdominal obstruction.

Inhalation  
Inhalation of mist may cause irritation to throat and or nasal passages. Chronic exposure may cause lung disease.

Skin Contact  
Could cause irritation, rash, itching, or dermatitis.

Eye contact  
May cause eye irritation.

Symptoms related to the physical, chemical, and toxicological characteristics  
Acute exposure to airborne dust concentrations in excess of the PEL/TLV may result in coughing, dyspnea, wheezing, and a burning irritation of the nose, throat, and upper respiratory tract, along with possible impaired pulmonary function. Chronic exposures may result in lung disease. (Silicosis and/or lung cancer)

Information on toxicological effects  
No toxicological data is available for this product. Toxicological information for components of this product listed below.

This product contains crystalline silica (quartz) as a naturally occurring impurity in some of the raw materials. The International Agency for Research on Cancer (IARC) classifies crystalline silica inhaled in the form of quartz or cristobalite from occupational sources as carcinogenic to humans, Group 1. The National Toxicology Program (NTP) classifies respirable crystalline silica as a substance which may be reasonably anticipated to be a carcinogen. OSHA does not regulate crystalline silica as a human carcinogen. Some products may contain attapulgite clay. IARC classifies attapulgite (long fiber) carcinogenic to humans, Group 2B. Attapulgite is not classified as a carcinogen by NTP or OSHA. Exposures to respirable crystalline silica are not expected during the recommended use of this product. However, actual levels must be determined by workplace Industrial Hygiene testing.

Reproductive effects  
Not available

Specific target organ toxicity – single exposure  
Not available

Aspiration toxicity  
Not available

12. Ecological Information

Ecotoxicity  
No Data

Persistence and degradability  
No Data

Bioaccumulative potential  
No Data

Mobility in soil  
No Data

Other adverse effects  
No Data
13. Disposal Considerations

Disposal instructions  Waste must be disposed according to local, state, federal and international environmental control regulations.

14. Transport Information

This product is not a DOT hazardous material

Shipping Name  Same as product name
ICAO/IATA/IMO  Not applicable

15. Regulatory Information

All ingredients are included on the TSCA inventory.

Federal Regulations
SARA Title III  Not listed under Sections 302, 304, and 313
CERCLA  Not listed
RCRA  Not listed
OSHA  Dust and potential respirable crystalline silica generated during product use may be hazardous.

State Regulations
California Prop 65: Respirable crystalline silica is known to the state of California to cause cancer. Industrial hygiene monitoring during recommended use of this product failed to identify any respirable crystalline silica.

Canada WHMIS
All components of this product are included in the Canadian Domestic Substances List (DSL). Crystalline silica: WHMIS Classification D2A
16. Other Information

Further information

Crystalline silica: Raw materials in this product may contain respirable crystalline silica. Exposures to respirable crystalline silica are not expected during the normal use of this product. However, actual levels must be determined by workplace hygiene testing. Prolonged and repeated exposure to airborne free respirable crystalline silica can result in lung disease (i.e., silicosis) and/or lung cancer.

Attapulgite: Carcinogenic to experimental animals via a route of exposure not relevant to human exposure.

NFPA Ratings

NFPA health hazard: 1 - Exposure could cause irritation but only minor residual injury even if no treatment is given.
NFPA fire hazard: 0 - Materials that will not burn.
NFPA reactivity: 0 - Normally stable, even under fire exposure conditions, and are not reactive with water.
